

# Eco Explorer Experience

## A JOURNEY OF DISCOVERY AND PRESERVATION

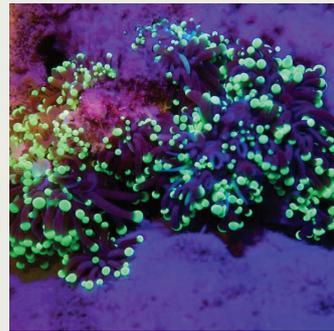

Embark on an odyssey into the heart of conservation with our Eco Explorer Experience. Here, the mysteries of the ocean unfold, fostering a deeper connection and commitment to the marine environment. Join us as we endeavour to preserve the beauty and balance of coral ecosystems, vital to our planet's health, and adopt practices that honour and protect our aquatic world.

Set off on a captivating journey with our resident marine biologist for an enlightening snorkelling tour along the vibrant Baros House Reef. Plunge beneath the surface to marvel at the diverse array of tropical fauna and gain invaluable insights that will transform your perspective on snorkelling experiences.

As the sun sets, immerse yourself in the nocturnal wonders of the reef. Our fluo-night snorkelling adventure reveals the hidden marvels of marine life, illuminated under blue UV lights. This extraordinary experience offers a glimpse into the health of corals, guiding you to identify thriving ecosystems and areas in need of protection.

Contribute to the rejuvenation of fragile reef habitats through our coral gardening initiative. With expert guidance, you will have the opportunity to plant personal coral frames, giving damaged corals a renewed chance to flourish. This meaningful act contributes to a lasting underwater legacy.

This transformative journey, led by our resident marine biologist, kindles hope for a sustainable marine future. It's an invitation to become guardians of the sea, deepening your connection to the natural world.

Embark on this purposeful adventure, not just as a traveller, but as a true advocate for the oceans. Join us at Baros and leave a positive mark on the world beneath the waves.

### The package includes:

- An engaging presentation on coral ecology and restoration efforts, held at the Dive Centre
- Planting one coral frame and one coral cube, aiding reef restoration
- A comprehensive fish identification session in the Dive Centre, enhancing your underwater exploration
- A guided snorkelling tour focused on fish identification
- An introductory presentation to night snorkelling and underwater fluorescence in the Dive Centre
- An immersive night snorkelling session, a mesmerising glow-in-the-dark (fluorescence) session or a combined session of night and glow-in-the-dark snorkelling
- A personalised digital photo book documenting your Eco Explorer Journey
- A USB flash drive filled with all photos and videos captured during your adventure
- A certificate of participation, marking your contribution to marine conservation
- Bi-annual updates on the progress of your planted corals for two years, keeping you connected to the ongoing growth of the reef

### Price:

350 USD++ for an unforgettable journey, accommodating up to three participants.
